CAREER OBJECTIVE

Aspiring AI Software Development Engineer with strong foundations in Data Structures, Backend Engineering, MERN Stack Development, and Cloud Technologies. Experienced in developing scalable applications, REST APIs, and AI-powered solutions through a backend engineering intern and projects. Seeking opportunities to contribute to high-impact software products while continuously learning and growing as an engineer.

EDUCATION

B.Tech | Computer Science and Engineering **Sep 2023 - Aug 2027**
CGPA: 9.16 / 10 | Reva University | Bangalore

PUC(PCMB) , KSEEB **2023**
Percentage : 93.6% | MPPU College | Belagavi

SSLC , KSEEB **2021**
Percentage : 95.6% | SBVHS School | Belagavi

SKILLS

Programming Languages: Python3, Java, C, JavaScript
Web Technologies: HTML5, Tailwind CSS 3, React.js, Node.js, Express.js, FastAPI
Cloud and DevOps: Docker, GitHub Actions CI/CD, AWS (S3, IAM, EC2, SES)
Databases: MongoDB, PostgreSQL
AI/ML: Scikit-learn, TensorFlow, DVC, MLflow, LangChain, LangGraph, LangSmith, RAG, Vector Databases, LLM APIs (Groq, OpenAI), Prompt & Context Engineering, AI-assisted coding(GitHub Copilot, Cursor)
DSA and CS Fundamentals: Data Structures & Algorithms, Problem Solving, OOP, DBMS, Operating Systems, Computer Networks
Software Engineering: Software Development Life Cycle (SDLC), Coding Best Practices, Debugging, Testing

EXPERIENCE

Backend Developer Intern, https://researchportal.reva.edu.in, Reva Development Centre **Nov 2025 - June 2026**

- Engineered a multi-role backend system with JWT-based Role-Based Access Control, enabling secure, role-specific access.
- Optimized MongoDB schemas and integrated Redis caching, reducing API response time by 38% and improving dashboard performance.
- Implemented automated backend API tests using Jest to validate endpoint functionality, verify expected responses, handle edge cases, and identify regressions, improving API reliability and code quality.
- Built a multi-level coursework approval workflow, managing complex state transitions and notifications across user roles.
- Architected scalable REST APIs using Node.js and Express.js with validation, structured error handling, and modular routing.

Open Source Contributor and Project Admin | GSSoC 2026 **June 2026 – Aug 2026**

- Improved backend code quality and implemented new features to enhance project functionality and maintainability.
- Maintained an MLOps project repository, supporting development, reviewing contributions, and coordinating ongoing improvements.
- Reviewed pull requests, resolved merge conflicts, and managed code integration using Git and GitHub.

ACADEMIC PROJECTS

Document RAG **Apr 2026 - July 2026**

- Built a document Q&A chatbot using Retrieval-Augmented Generation (RAG) to retrieve relevant PDF content and generate context-aware answers.
- **Stack:** Python3, FastAPI, LangChain, Groq LLM, ChromaDB, Hugging Face Embeddings, PyMuPDF, Pydantic

AI Blog Writing Agent **Feb 2026 - May 2026**

- Built an AI agent using LangGraph to generate structured, publishable Markdown blogs with relevant images from user-provided topics.
- **Stack:** Python3, LangGraph, LangChain, Groq LLM, Streamlit

MLOps Kidney Disease Prediction **Jan 2026 - June 2026**

- Built an end-to-end CNN-based image classification pipeline using VGG16 transfer learning to predict kidney disease from medical images.
- **Stack:** Python3, TensorFlow, MLflow, DVC, Flask, Docker, GitHub Actions CI/CD, AWS

CERTIFICATIONS

- Full Stack Web Development, Udemy **2025**
- Generative AI, Udemy **2025**
- Claude 101, Anthropic **2026**
- AI Fluency, Anthropic **2026**

ACHIEVEMENTS

- Solved 270+ DSA problems on LeetCode **2026**
- Secured 3rd place at the AINEX Hackathon, REVA University **2026**

EXTRACURRICULAR ACTIVITIES

- Member, DevTrack Club, Reva University **2025**
- Open Source Contributor and Project Admin, GSSoC **2026**

Languages: English (Fluent) | Kannada (Native) | Hindi (Conversational)

Interests: Driving, Horse Riding, Gaming
